What have you done to prepare yourself to be a member of the City Council?
What are your plans to help the homeless and low income people in Sioux Falls?
How will you move forward with the future of Sioux Falls in the arts?
What is your position on mass transportation? What will you do to encourage ridership? What do you do with an organization where all the vehicles and property are owned by the city, the employees work for a second company and are run by a third company such as the Sioux Falls Area Metro?
What property or business holdings do you have besides your residence and what is your day job?
Do you support an Events Center? If so, how should we pay for one and where should it be located?
What is the role of City Council Members in working with different local and state organizations such as County Commissioners and State Legislatures?
What will you do to improve the maligned reputation of the Pettigrew Heights and Central District?
What will you do to balance representing your district and the city as a whole?
How can Sioux Falls improve the recycling program? Are we as green as we should be as a community?
Is city planning headed in the right direction regarding growth and development? Is there a point where the city becomes too big?
Closing remarks.
