Turbak reviewed the following points of interest: when the City does or doesn't issue debt; specific points related to debt management; tools available for borrowing money; considerations taken into account on when to borrow money; review of the current debt situation; the monitoring of debt; and future City debt. Discussion followed.

Jamison asked about the existing debt that the City has for the levee project. Discussion was held regarding when this debt is callable. Turbak stated it is five years out.

Jamison asked what the recommendations are for the \$9.7M received back from the Army Corps of Engineers. He asked, if no debt is going to be paid down, could an interest bearing account be an option and what kind of interest rate could be attained. Discussion followed.

Turbak stated he will have a memorandum coming to the City Council with recommendations for dispersing these funds.

Aguilar asked if the City would be refinancing any of the current debt and, if so, would the payoff period be lengthened? Discussion followed.

Aguilar asked about the second penny sales tax being used for debt service. Discussion followed.
